SUMMARY

Product Designer with four years at Lumel Technologies, working on enterprise analytics, data storytelling, and connected planning. Experience spans requirements, user flows, prototyping, interaction and visual design, developer handoff, and implementation review for Inforiver Analytics+ in Microsoft Power BI and PowerTable in Microsoft Fabric.

EXPERIENCE

Lumel Technologies | Chennai, India

Product Designer II | Jan 2025 - Present
Product Designer I | Jul 2023 - Jan 2025
Contractor | Oct 2022 - Jul 2023

- Work with product managers, developers, and stakeholders across requirements, existing-experience reviews, flow and prototype walkthroughs, handoff, and implementation-fidelity review.

Earlier experience

Arus Info | Chennai, India
UX/UI Designer, Apr 2023 - Jul 2023; Trainee Engineer, Jul 2022 - Jun 2023

Velsure Softech Solutions Pvt Ltd | Madurai, India
Project Intern, Dec 2021 - Apr 2022

SELECTED PRODUCT WORK AT LUMEL

Inforiver Analytics+ | Microsoft Power BI

- Designed the shipped Chart Wizard experience, supporting chart-family browsing and analytical-goal-based discovery alongside customization and advanced configuration.
- Contributed to Storyboard enhancements, annotations, presentation mode, slideshow interactions, Text-to-Visual, and PowerPoint visualization templates.
- Designed reusable KPI templates that shipped. Broader design deliverables included **30+ KPI layouts, 20+ presets, and 70+ custom icons**.
- Worked on redesigned configuration side panels that were implemented and in use.

PowerTable | Microsoft Fabric

- Designed end-to-end Gantt and resource Gantt experiences, with contributions to cross-tab layout and data configuration.
- Design scope covered task creation and editing, timeline and timescale interactions, column configuration, navigation, baseline comparison, effort tracking, and export.
- Connected resource assignment, backlog, time tracking, and workload visibility; contributed to rows, columns, measures, and contextual cross-tab settings.

SKILLS

Design: Requirements analysis, workflow review, user flows, prototyping, interaction design, visual design, reusable interface patterns.

Delivery: Developer handoff, stakeholder walkthroughs, implementation review.

Domains: Enterprise analytics, data visualization, KPI cards, data storytelling, task and resource planning.
